Attachments: 2012 burns.xlsx; bhst.xls

Mark,

I believe this is everything, and it's not perfectly formatted (2012 that is). If you need it now, this is your best bet. If you wait till later this week or early next we'll have a complete version online.

Adam,

I thought the 2012 data was up but it doesn't appear to be there....can you help this person?

Mr. Briggs,

I understand you have discussed Konza Prarie burn history with Gina Grier of US EPA Region 7. I am working with Gina to plot wind trajectories for days during which there was a burn at the Konza Prarie site. I have two requests: May I have the 2012 burn data, if it is available? The latest data on the web site is 2011. Also, would you happen to have the 2000-2012 data available in a tabular format (excel, csv, etc.)? I can extract the 2000-11 data from the web page, but if you already have it handy in a tabular format, it would be helpful.

Thank you for your assistance.
Mark
